Message from the Dean Faculty of Pharmacy Universitas Muhammadiyah Purwokerto

I am fully delighted to welcome all participants of the International Seminar "Natural Product for Cancer Chemoprevention" which held and organized by Faculty of Pharmacy Muhammadiyah University of Purwokerto

Cancer is the second disease with high morbidity in the world after cardiovascular disease. WHO reports that 70% of death caused by cancer occur in countries with lower-middle income percapita. Indonesia belongs to the countries mentioned above. It is general of facts that natural products have played an important role in the social health care system. The using of natural products might be an alternative for cancer therapy.

I hope that all scientists and researchers participating in this event will share their thoughts and experiences on the latest development and research findings in natural product for cancer therapy. I am sure that this event will give advantages for all of us.

Finally, I would like to express my deep gratitude to all participants for their contributions to the success of this event. I hope you will have success in our international seminar and have a nice memorable visit to Purwokerto

Drs. H. Moeslih Hasanmihardja, Apt
Dean of Faculty of Pharmacy

Message from the Chairperson of the Organizing Committee

First of all, I would like to convey my warmest welcome for all distinguished guests and participants on the International Seminar "Natural Product for Cancer Chemoprevention". I am very happy that numbers of young scientists, researchers, lecturers, industry leaders, health practitioners, and representatives of private and governmental institution participate in this event.

This scientific event is held to provide an opportunity to the participants to share knowledge and experiences and establish links to lead our steps to the right direction in utilizing and developing natural potentials for the sake of human well-being. Especially the using of natural products which potential to be used as an alternative for cancer therapy. This seminar is expected to provide information about cancer and its therapy as well as a means of dissemination of the research on the potency of natural products. This seminar was also held in order to celebrate 46th anniversary of Muhammadiyah University of Purwokerto and 11th anniversary of Faculty of Pharmacy Muhammadiyah University of Purwokerto.

In this opportunity, I would like to thank all of invited speakers and participants for their contribution to the success of this event as well as to the steering committees and organizing committees for their best commitments and efforts to make this event a great success. Thank you very much and enjoy your meeting.
