Article is quite interesting but it needs major revision

Please add two citation from IJPPS and Highlight with Red colour figures are needed which shows different bonding between the receptor and molecules.

Need to put table and figure at appropriate place in manuscript.

Comments-

For revision of your article see the following points

- Format-: Headings and subheading should not be numbered.
- Abbreviations-: At the first appearance in the abstract and the text, abbreviations should be preceded by words for which they stand.
- Abstract: Rewrite Abstract which should be structural (Divide it into- Objective, Methods, Results, and Conclusion).
- Symbol and units: It should be as per International System of Units (SI). See it in instructions to authors and follow accordingly and strictly.
- Equation tools should be used for formula/equation writing.
- Errors: Grammatical and punctuation errors should be rectified. Authors are suggested to use smart tools like 1 checker, ginger, grammarly, white smoke, etc.
 - Most of the words are sticked, rectified it strictly.
 - Insert Table(s) and Figure(s) in Result and Discussion Section at appropriate place.
 - Headings of table (s) and figure (s) should be rectified. See latest issue of AJPCR
 - Table: Column headings should be in sentence case and bold. See latest issue of AJPCR
 - Fig: Ensure that titles at x and y axis are in sentence case and bold.
 - Reference citation- References are to be cited in parentheses/Square bracket like [1] in line with text.
 - Ensure citation of references as [1, 2] in case of 2 references and [1-3] in case of more than 2 references. Few other examples include [1, 2, 3-5, 6].
 - References: References are out of format. Uniformity must be ensured in all the references. It should be made strictly as per Instructions to Authors. Journal's title should be non italic, abbreviated without use of full stop.
 - Pagination style is incorrect in references. Authors should refer any latest published article in AJPCR. Digit appeared in starting page number should not be repeated in end page number. Ex. 12-5, 25-32, 125-7, 11456-62 etc.
- Introduction: What is rationale and novelty of study? It should be mentioned.
- Results of same data have been given by table as well as by figures. Use only one mode table or figure.
- Results should be expressed in mean \pm SD/SEM. Sample size and proper foot notes should be mentioned below tables.
- Error bars should be included in the figure(s). Sample size and proper foot notes should be mentioned below figure(s).
- Discussion could not be found. Only results have been given. Authors should make comparison with previously reported such works to emphasize importance of the presented work.
- Considering the content of the manuscript, a short communication would be more appropriate form than the full length article. Reformat it accordingly. See latest issue and instructions to authors of AJPCR
 - See attachment for more comments and queries.

(All the changes made must be highlighted with RED coloured fonts or it should be done in track change mode).

Response to comments:
