INTERNATIONAL CONFERENCE OF NURSES 2016

NURSES: *A Force for Change: Improving Health Systems' Resilience Thru Research*

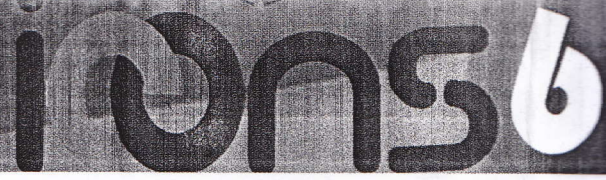

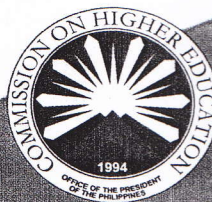

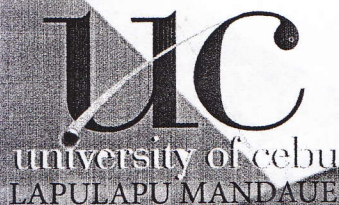

November 24, 2016

Marco Polo Plaza, Cebu, Philippines

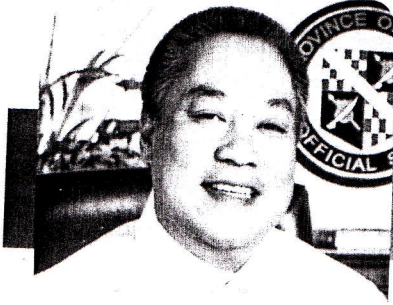

ABOUT THE CONFERENCE

In the past years, Cebu Normal University – College of Nursing was successful in gathering together brilliant minds from different parts of the globe. The Cebu International Nursing Conference and the International Conference of Nurses had brought numerous contributions to the dissemination of academic learning. Hence, we will once more bring to you an avenue for an intellectual forum for professional nurses and nursing students around the globe this coming November 24, 2016. Cebu Normal University – College of Nursing in cooperation with various higher education institutions and other associations will be initiating the 6th International Conference of Nurses in MarcoPolo Plaza, Cebu City with the conference theme “NURSES: A FORCE FOR CHANGE: IMPROVING HEALTH SYSTEMS’ RESILIENCE THRU RESEARCH”. This shall serve as an opportunity for the sharing of expertise and successful experiences in research.

OFFICE OF THE GOVERNOR

Greetings to the participants of the 6th International Conference of Nurses.

Research is an important tool in continuous healthcare development. The present and future medical landscape is determined by the developments achieved and findings gathered in scientific research and undertakings.

This gathering is an excellent opportunity for an exchange of knowledge, ideas and experiences. I thank Cebu Normal University – College of Nursing for once again taking the lead in organizing this event, gathering nursing students and professionals to further advance healthcare through research.

The nursing profession is, and will remain, a key player in the delivery of optimum healthcare to the community. Quality healthcare empowers people to maximize their full potential, to aspire for greater heights and to live better lives.

I wish you a meaningful and productive conference.

Welcome to Cebu.

November, 2016

HILARIO P. DAVIDE
Governor

"Three Top Change: Improving Health Systems' Resilience Thru Research"

OFFICE OF THE MAYOR

October 14, 2016

In behalf of the Cebu City Government I am extending my warm greetings and congratulations to Cebu Normal University for organizing this conference that will gather exceptional and talented nursing students across the globe.

Let me also take this opportunity to say my message to all participants: as a nurse you are given a golden opportunity to heal the mind, soul, heart and body of your patients. They may forget your name but they will never forget how you made them feel wanted and important.

Once again, my sincerest greetings and congratulations!

HONORABLE TOMAS R. OSMENA
City Mayor

Republic of the Philippines
CEBU NORMAL UNIVERSITY
OFFICE OF THE VICE- PRESIDENT FOR RESEARCH,
EXTENSION AND PUBLICATION

GREETINGS!

Our warm welcome to the participants of the International Conference for Nurses 2016!

It is indeed a pleasure to once again celebrate the power of research dissemination through this conference with the involvement of both professional and students in nursing. This exercise demonstrates our continued aspirations to generate new knowledge and enhance existing ones. May everyone enjoy the event and thank you for your continued support.

DAISY R. PALOMPON, PhD
VP, Research, Extension and Publication

Programme

7:00 AM	Registration	
9:00 AM	Doxology	CNU Chorale
	Philippine National Anthem	CNU Chorale
	CNU Hymn	CNU Chorale
	Grand Processional	
	Opening Salvo	CNU Chorale
	Presentation of Delegates	MR. JULIUS DAÑO <i>ICONS 6 Convenor</i>
	Words of Welcome & Conference Rationale	DR. DAISY R. PALOMPON <i>Vice President - REP</i>
	Introduction of the Keynote Speaker	DR. MARYLOU B. ONG <i>Conference Patron/Dean - College of Nursing</i>
	Keynote Address	NEMUEL S. FAJUTAGANA, MD, MHPED <i>Professor and Dean of NTTCHP - UP Manila</i>
	"Nurses: A Force For Change: Improving Health Systems' Resilience Thru Research"	
	Plenary Speech	FITRI AROFIATI, S.KEP.,Ns.,MAN,Ph.D <i>Head - Master of Nursing Universitas Muhammadiyah Yogyakarta</i>
11:00 AM	Coffee break	
11:15 AM	POSTER Exhibit and Presentation	
12:00 NN	Lunch Break with Cultural Presentation	
1:00 PM	CONCURRENT PODIUM PRESENTATION PROFESSIONAL CATEGORY	
	Concurrent Session A	Plenary Hall/Ballroom AB Hall
	Concurrent Session B	Tokyo A Hall
	Concurrent Session C	Tokyo B Hall
	Working Break	
3:00 PM	CONCURRENT PODIUM PRESENTATION STUDENT CATEGORY	
	Concurrent Session D	Plenary Hall/Ballroom AB Hall
	Concurrent Session E	Tokyo A Hall
	Concurrent Session F	Tokyo B Hall
4:30 PM	Closing Program	
	Awarding of Winners	
	Closing Remarks	DR. BIBIANA T. ISOK <i>Vice President of Academic Affairs</i>

PROF. ERIC REMOROZA
Master of Ceremony

November 24, 2015 (Thursday)
 Professional Category - Podium
CONCURRENT SESSION B

Time: 1:00 – 3:00 PM
 Venue: Tokyo A Hall
 Moderator: Mr. Vincent Pananganan
 Judges: Mr. Ferdinand Abocejo
 Mrs. Norma Hinoguin
 Session Manager: Ms. April Kyle Inabangan
 Tech Team: Selena Rose Y. Pinote
 Time Keeper: Ms. Blessie Marie Bihag

RESEARCH TITLE	PRESENTER/AUTHORS AND INSTITUTIONS
Patient Safety Culture in Selected Hospitals in Cebu	Auda F. Russel RN, MN, DScN; Cyrille Y. Panimdim RN, MN; Charlot Pardillo RN; Fortune Mae Rafols <i>Cebu Institute of Technology – University, Philippines</i>

The Extent of Application of Virginia Henderson's Theory among Staff Nurses in the Different Areas of Amai PakPak Medical Center	Janisha M. Malawani-Mandara <i>Amai PakPak Medical Center, Marawi City, Philippines</i> and Athena Jalaliyah B. Derico-Lawi <i>Mindanao State University, Main Campus, Marawi City, Philippines</i>

Podium Presentations

"The Effectiveness Of Telenursing To Improve Medication Adherence On Psychiatric Patients"

Siti Nurjanah; Rozali Arsyad; Agus Riyadi
University of Muhammadiyah Purwokerto Indonesia

Non adherence often occurs on psychiatric patients. Telenursing intervention was proven to be used as alternative to improve medication adherence on patients with chronic disease. This research aimed to examine the effectiveness of telenursing by short messages services (SMS) as the counseling media toward psychiatric patients adherence. This research was a quasi experiment. The sampling technique was by consecutive random sampling. Medication Adherence Rating Scale (MARS) was the instrument to measure adherence and questionnaire was used to value frequent of families forget to give medication to patients. The data was analyzed with Wilcoxon Test and Mann Withney Test. The result of Wilcoxon test to find out the effect of telenursing intervention toward psychiatric patients' in medication adherence with p-value 0,001 and frequent of families forget to give medication to patients with p-value 0,0001. Mann Withney test resulted with p-value 0,0001 in medication adherence and frequent of families forget to give medication to patients with p-value 0,0001. Statically telenursing intervention was more effective to improve the medication adherence and decrease frequent of family forget to give medicine to patients compared to the control group. Telenursing intervention by SMS could be used as an alternative to increase medication adherence on psychiatric patients.

"Lived Experiences Of First Responders In Caputatan Norte During Yolanda's Wrath"

Hazel L. Caneda; Aida A. Inabangan; Jillian A. Bejoc
Cebu Normal University

The study aims to explore and describe the meaning of the lived experiences of first responders at the height of typhoon Yolanda's outrage. This study will utilize Edmund Husserl's descriptive phenomenological approach to discover and understand the true essence of the lived experiences of first responders at the height of typhoon Yolanda's rage. The study will be conducted in Barangay Caputatan Norte which has been badly hit by typhoon Yolanda. After the analysis of data utilizing Colaizzi (1978) strategy, four clustered themes emerged were: AWARENESS; PREPAREDNESS; INITIATIVE and ACCEPTANCE. As natural calamity arises in a certain area, the involvement of leaders and other key persons is very important. It is best to have people who will be taught on the proper disaster risk management, thus, they will be the one to help in stabilizing or pacifying the situation should an earthquake, typhoon or any other natural calamities arise. First responders to these kind of events should be established in every area there is in the country.

"Implementation of the Breastfeeding Program in Two Maternity Centers of Cebu"

Josephine A. Uy, MAN
University of Cebu

This study determined the implementation of breastfeeding program in two maternity centers of Cebu named Dr. Veronica N. Alivio's Lying-In Center in Consolacion, Cebu and Estardo's Birthing Home in Marigondon, Mactan. A descriptive correlational research design was utilized with a thirty item four point Likert scale researcher-made questionnaire. There were about 50 research participants who were nullipara mothers giving birth at the chosen birthing or lying-in centers. Reliability test obtained a result of 0.933 indicating that the research instrument was highly reliable. On the level of people implementation of breast feeding program, educating mothers about colostrums and its significance; offering information on relieving breast engorgement; and encouraging exclusive suckling of the baby without the use of pacifier or artificial nipples were less implemented. Routinely communicating to all people through bulletins, posters, banners and other visual aids; raising issues and concerns on maternal cultures, beliefs, and values on breastfeeding; ascertaining the mother a breastfeeding friendly approach; considering the space and time of the mother to breastfeed the baby; ensuring that a well-trained and technically skilful health care staff or personnel exercised breastfeeding; and providing policies that enable a mother to breastfeed the baby were less implemented. Environment implementation revealed that rooming-in for 24 hours were fully implemented and promoting a mother and baby friendly hospital initiative; conducting seminar, bench classes and clinic conference, offering post-training support or breastfeeding group; upholding an environment where mothers can learn about breastfeeding and develop breast feeding techniques and maintaining a workplace where mothers and healthcare personnel work harmoniously were less implemented. Age and people implementation; age and process implementation; age and environment implementation showed significant relationship. The researcher therefore concluded that breastfeeding program in general was implemented in two Maternity Centers of Cebu. Recommendations focus on the health and wellness of mothers; promotion of breastfeeding strategies and further studies on cost effective strategies for breast feeding.
